

Brilliant Products for Rent

**Maximum
Uptime**
with High-
Quality Rental
Equipment

Just what you need when you need it

The right tool is half the job. Yet you know how it is, when you need it, you don't have it. But we do.

The IK Topside rental service ensures that your projects run smoothly, minimizing downtime and maximizing efficiency.

Preparing for turnarounds or facing maintenance tasks?

We have a comprehensive selection of high-quality equipment to support your operations.

Calibrated, tested, and ready to go

Our equipment undergoes rigorous inspection, calibration, and maintenance to ensure it arrives at your site in optimal condition. Primed and ready for seamless integration into your workflow!

Contact our team of specialists!

Don't let equipment logistics hold you back. Our rental service helps you focus on what matters – getting the job done.

Controlled Bolting and Flange Work

Equipment for controlled tightening and loosening of bolted flange connections using torque and tensioning methods. Used during installation, maintenance, and shutdown activities to ensure correct bolt load and leak-free connections.

Key facts

Accurate torque and tensioning → predictable bolt load across all studs

- Reduces risk of flange leaks caused by uneven load
- Complete tool sets → fewer vendors and faster execution

Hydraulic Bolt Tensioner
Slim – Multi Stage

Hydraulic Bolt Tensioner
Slim – Multi Stage

Hydraulic Torque Wrenches
Low Profile

Hydraulic Torque Wrench
Square Drive

Hydraulic Bolt Tensioner
Subsea

Hydraulic Bolt Tensioner
Standard

Hydraulic Tensioning Pump
Manual & Pneumatic

Hydraulic Torque Pump
Pneumatic

Torque Calibration Equipment
Torque Tester

Hydraulic Torque Pump
Electric

Hoses
High-Pressure Hydraulic

Couplings and Fittings
High-Pressure Hydraulic

Nutsplitters

Hydraulic

Bolt extraction tools

Hand tool

Flange Alignment Tools

Manuel & Hydraulic options

Flange Spreading Tools

Manuel & Hydraulic options

Hot Bolting Tools

Specialized clamp systems enabling safe replacement of individual bolts on pressurized flange connections without shutdown. Maintains joint integrity and sealing while work is performed on live systems.

Key facts

- Replace individual bolts under full operating pressure → no system shutdown
- Maintains gasket load during intervention → preserves sealing integrity
- Enables operator independence → perform the operation in-house with training

Wonder Clamp System

Multi-size Clamp Coverage Kits

XI Clamp

Extreme Integrity Clamp for Critical Applications

Hydrostatic Pressure Testing Equipment

Equipment used to verify pressure integrity of pipelines, vessels, and welded connections through controlled hydrostatic testing.

Key facts

- Confirms Joint/system integrity before commissioning or restart
- Wide plug and test range → adaptable to different pipe sizes and systems
- Localized testing zones → reduce test scope and execution time

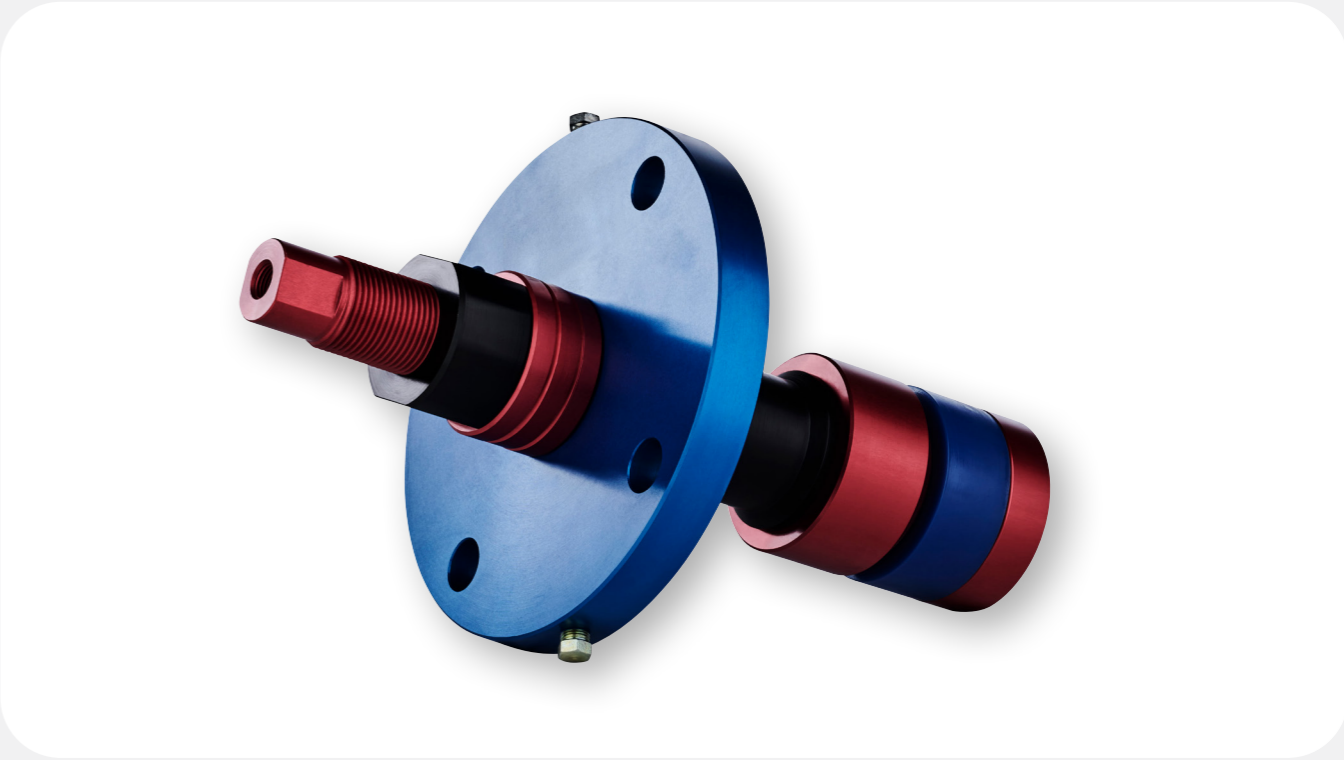

Test kits

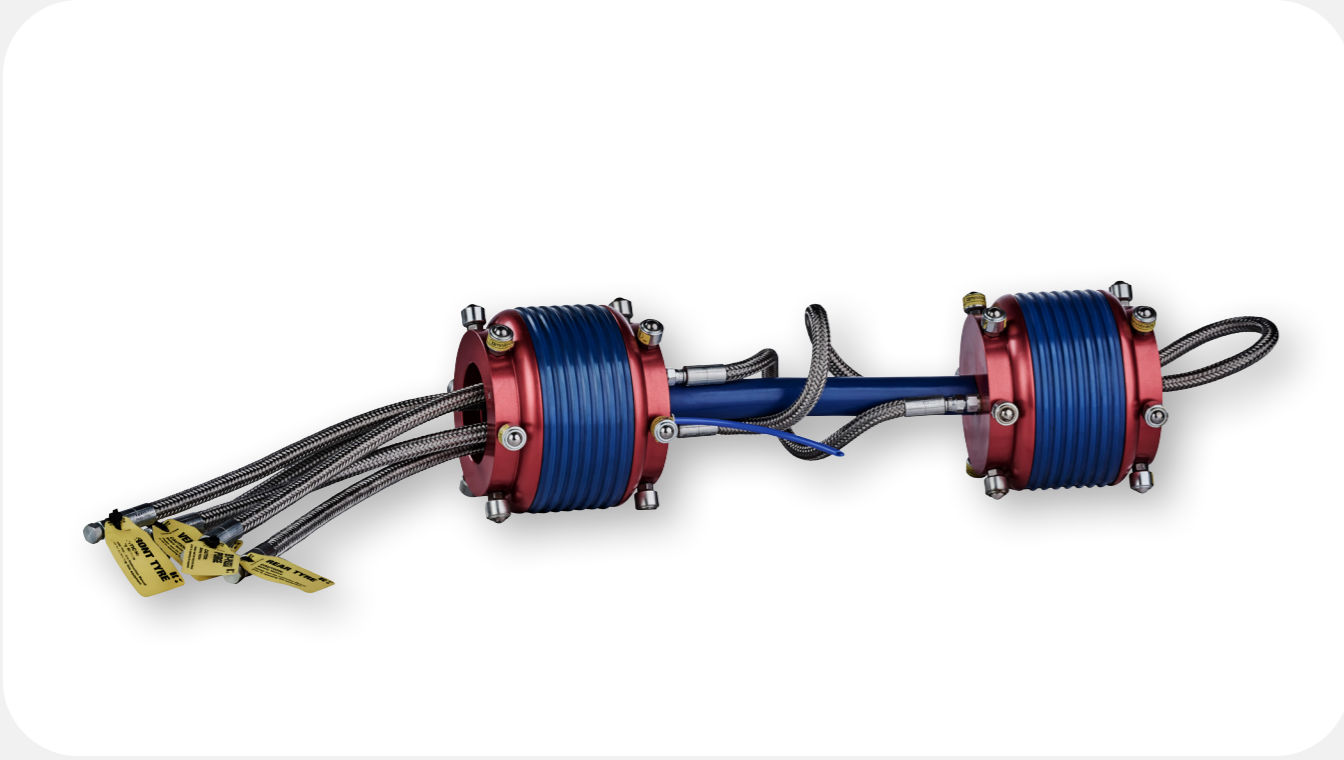

Full coverage

Mechanical Test Plugs
With Mechanical Grippers

Flange Weld Test Tools
Localized tester

Inflatable Test Plugs
Flexible Isolation & test plugs

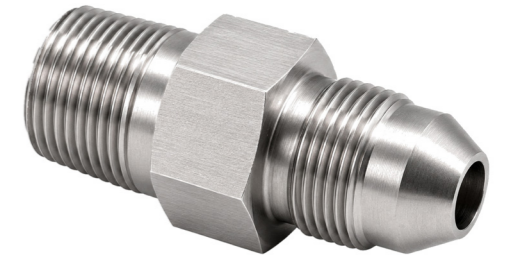

Internal Weld Joint Testers
Localized tester

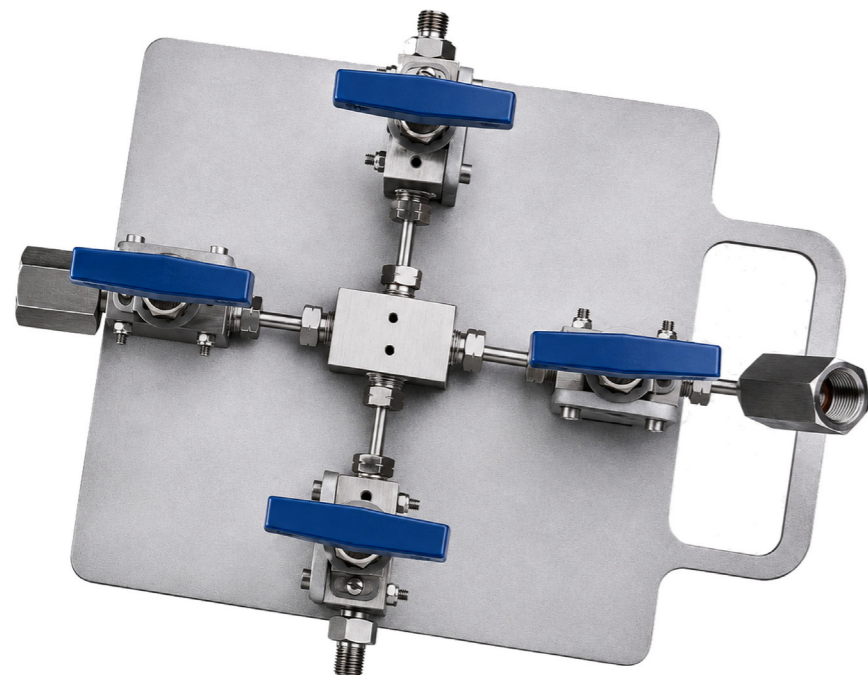

Pipe End Caps / Blind Flanges

Fullscale Testing

Test Hoses & Connections

Low- and high-pressure

Test Manifolds and Distribution Systems

Manifolds with Multiple connections available

High-Pressure Test Pumps and Gas Boosters

Manual & Pneumatic

Pressure Loggers and Data Acquisition Systems

ATEX-Certified

Isolation Barriers

Pressure/Atmospheric

Temporary isolation solutions used to safely separate sections of piping or systems during maintenance or modification.

! Key facts

- Enables isolation without draining or depressurizing entire systems
- Mechanical plugs provide positive isolation for high-risk interventions
- Establish local safe work zones → avoid full system degassing

High Pressure
Mechanical Pipeline Plugs

Single Seal

Double Isolation
Weld Plugs

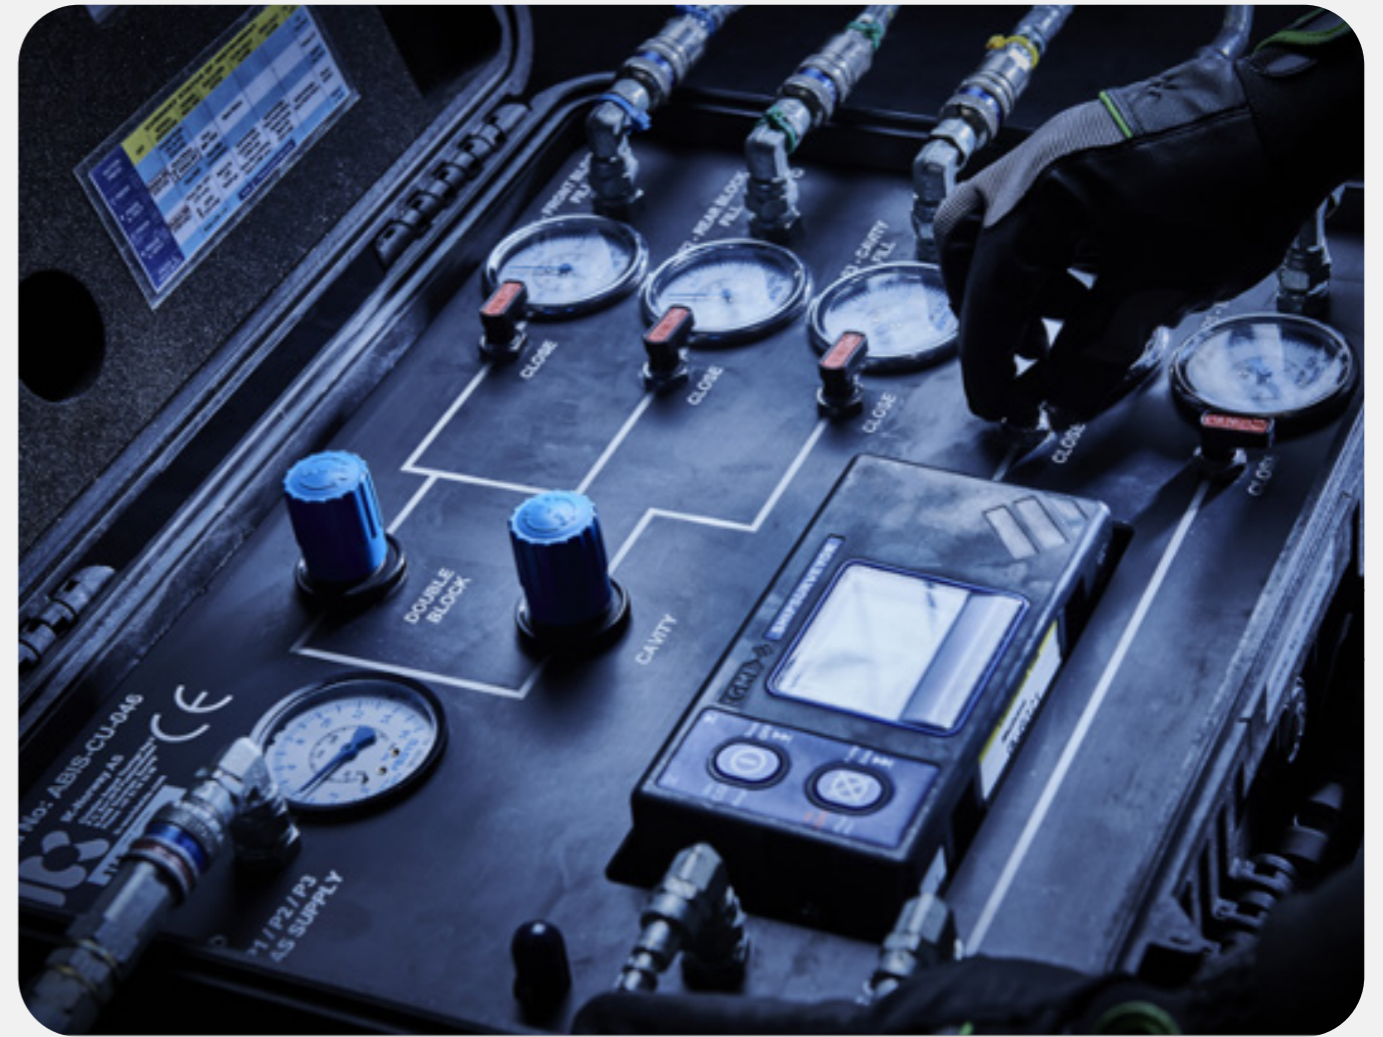

Multi Seal

Inflatable Pipe Stopper
Low / Medium Pressure

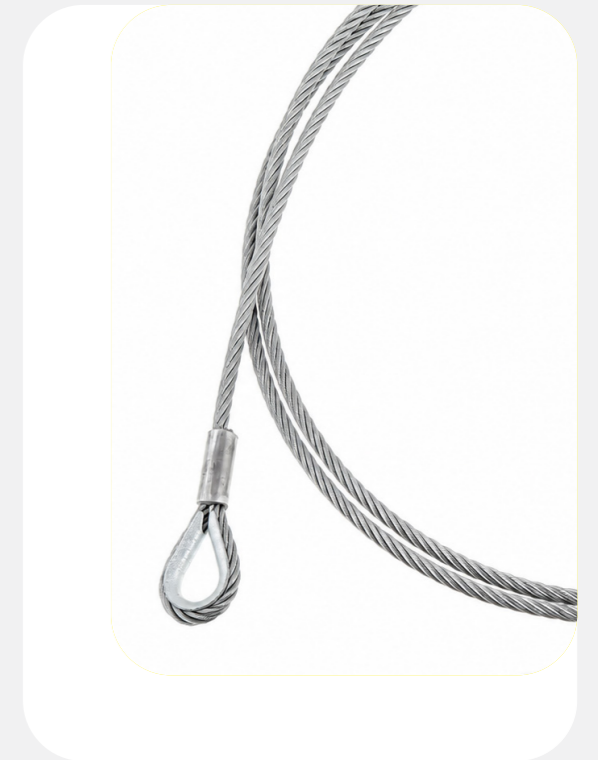

Inflatable Pipe Stopper
Low / Medium Pressure

Inflation Systems
Regulators, Control Panels

Monitoring Systems
Pressure Monitoring,
Leak Detection

Anchoring and Restraint Systems
Retrieval and dropped object prevention

Drain Plugs and Sealing Systems
Multiple sizes & applications available

Hot Tapping Machines

Equipment used to create new connections on live pipelines and pressurized systems without interrupting operation.

! Key facts

- Install connections on live systems without interrupting flow
- Eliminates production loss associated with shutdown-based modifications
- Scalable tooling for different pipe sizes and materials

Hot Tapping Machines

Manual, Hydraulic, Pneumatic

Cutter Heads and Hole Saws

Pilot Drills and Centering Systems

Hot Tap Fittings and Adapters

Coupon Retention Systems

Cold Connections

Lokring is a mechanical, cold-forming pipe connection system that creates a permanent, leak-tight joint without welding, threading, or flaring. It's widely used in industrial piping where speed, reliability, and no hot work are key.

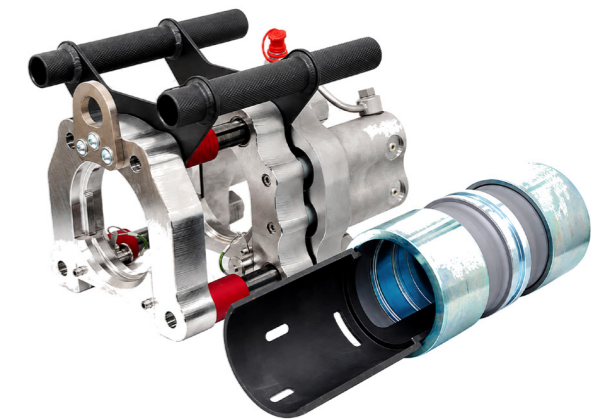

! Key facts

- Weldless (cold connection) → no heat input, no hot work
- Fast install → tool-controlled, consistent joints in minutes
- Leak-tight → permanent metal-to-metal seal

Installation Tool

Press Jaw Sets

Installation Tool

Press Jaw Sets

Air Compressors

Air supply systems are used to power tools and support site operations.

! Key facts

- Stable air supply for process, tools, and testing applications
- Configured for continuous industrial operation
- Filtration and drying options → protect equipment and process integrity

Portable Air Compressors

Electric, Diesel

Air Compressors

Oil-free compressors

Air Compressors

Oil-free compressors

Air Compressors

High-pressure compressors

Air Compressors

High-pressure compressors

Air Compressors

ATEX-certified compressors

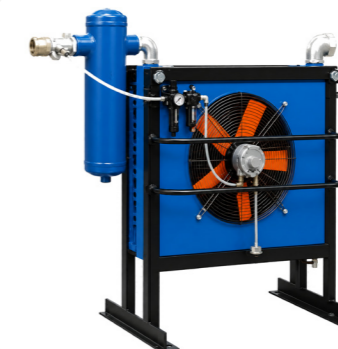

Air Compressors

ATEX-certified compressors

Air Compressors

ATEX-certified compressors

Air Compressors

Air dryers – desiccant / refrigerated
Air aftercoolers

Air Compressors

Filtration systems – oil / water separators

Air receivers / storage tanks

Air distribution hoses and manifolds

Pressure regulators and control panels

Power Generators

Temporary power supply solutions ensuring continuous and stable power for tools and operations.

Key facts

- Reliable temporary power for critical tools and operations
- Enables execution in remote or power-constrained environments
- Configured for continuous duty in industrial and offshore conditions

- Diesel generators
- ATEX-certified generators
- Containerized generator units
- Silent / low-noise generators

→ Availability

All listed equipment is available for rental, subject to configuration and availability. Standard equipment is available for rapid mobilization, while specialized setups may require planning and lead time.

→ Rental Options

Flexible rental models depending on scope and client requirements:

- Equipment only (client-operated)
- Equipment + IK Topside technicians
- Full support packages (equipment, personnel, and execution support)

Brilliant under Pressure

We enable operators to restore, maintain, strengthen, and modify topside pressurized systems during operation. We reduce the need for shutdowns – and improve the performance of those that remain.
